

I want to make my support for satellite radio and especially the local weather and traffic reports known in the strongest manner possible. I have had satellite radio for 2+ years now and I have found it to be invaluable. As a Coast Guardsman, I travel frequently and on short notice. XM radio's programming has made my travel enjoyable, and with the onset of the new weather and traffic services, easier.

Please do not limit or otherwise hinder the services of the satellite radio providers. The NAB is mistaken in their efforts against satellite radio. In my opinion, satellite radio is the best invention in broadcasting since Cable TV.

Thank you for your consideration.

Respectfully,
Matthew Fay
